Summary

Computer Engineering undergraduate (B.E., VCET Vasai, Mumbai; May 2027; CGPA 8.35) shipping AI-first products end-to-end: multi-LLM orchestration (Atom8), on-device edge AI (PayProtect, 97.1% accuracy), and local agent tooling with MCP (Olla). Published researcher (INCET 2025); full-stack intern at AxiSol; Google Student Ambassador and GDG on Campus Cloud Coordinator.

Education

Vidyavardhini's College of Engineering and Technology, Vasai, Mumbai

July 2023 – May 2027

B.E. in Computer Engineering — CGPA: 8.35/10.0

Relevant Coursework: Data Structures and Algorithms, DBMS, OS, Computer Networks, Software Engineering

Professional Experience

Fullstack Web Development Intern, AxiSol, Inc., Mumbai

Jul 2025 – Jan 2026

- Enhanced AxiSol's website with a new UI and SEO, increasing traffic by 32%.
- Integrated ReactJS, reducing load time by 1.8s.
- Built in-house asset generation using Google Imagen4 & Veo3 (GenAI), saving 25% in design costs.

Google Student Ambassador, Ping Digital Broadcast, Mumbai

May 2026 – Present

- Drive adoption of Google Gemini AI trials through campus workshops and outreach, educating students on LLM capabilities.
- Organize and host AI workshops and campus events; report milestones and feed student feedback into engagement strategy.

Projects

Atom8 – AI-Powered Data Structurizer & Insights Platform [Github](#)

- Built a multi-stage LLM orchestration pipeline (extraction, merging, noise removal, AI structuring) transforming unstructured multimedia data into clean JSON/CSV datasets.
- Multi-LLM support (Groq Llama 3.3 70B, Gemini 2.5 Flash Lite), AI-generated “Data Autopsy” PDF reports, real-time WebSocket progress; Next.js 15 + FastAPI.

Olla – Local AI Assistant with MCP [Github](#)

- Privacy-first desktop AI assistant (Electron + Ollama) with 100% local inference, screen-vision analysis, and a global hotkey (Alt+O).
- Implemented MCP (Model Context Protocol) with function calling — web search, file operations, calculator, and system-info tools.

PayProtect – On-Device Scam Detection (Research Paper) [Github](#)

- Developed the scam-detection CNN model and curated a custom 30K multilingual SMS dataset (English, Hindi, Marathi, Hinglish) across 5 classes (spam, promotional, transactional, ham, not ham).
- Parallel Conv1D architecture (kernel sizes 3/4/5) quantized via TFLite from 20 MB to 4.8 MB (-76%); under 20ms on-device inference via Android Accessibility Service.
- Achieved 97.1% accuracy, 98.2% precision, and 97.5% F1-score.

Achievements & Leadership

- | | |
|--|----------|
| First Prize, TechBlitz 12-Hours Hackathon (VCET) – Clinico healthcare platform | Mar 2026 |
| Fine-tuned LLaMA-4B on AMD MI300X at AMD AI Sprint, IIT Bombay | Jul 2025 |
| Published Research Paper at INCET 2025 (Sleep Apnea using Deep Learning) | Jun 2025 |
| Cloud Coordinator, Google Developer Group (GDG) on Campus, VCET | Sep 2025 |

Skills

Programming: Python, JavaScript, TypeScript, SQL, Java, C++

AI / LLM: LLM APIs (Groq, Gemini), RAG, Agentic AI, LangChain / LangFlow, MCP, Ollama, llama.cpp, Prompt Engineering, LLM Fine-Tuning (LLaMA-4B / AMD MI300X)

Web / Frameworks: React, Node.js, Next.js, FastAPI, Flask, REST APIs

Cloud & DevOps: AWS (CDK, Lambda, S3, EC2, Bedrock), GCP (Cloud Run, Vertex AI, BigQuery), Docker, CI/CD, Linux

Data & ML: PostgreSQL, MongoDB, MySQL, Redis, Pgvector, Firebase, TensorFlow, Scikit-learn, TFLite, CNNs
